

Os minidisjuntores S200 da ABB são a escolha perfeita para a proteção de circuitos em instalações elétricas das mais diversas aplicações com alto requisito em solução compacta. Todas as cargas estão protegidas contra sobrecorrentes e curto-circuitos, e a vasta gama de acessórios permite uma solução completa e de alta confiabilidade e segurança.

Principais características

Indicação da Posição do Contato

Os minidisjuntores S200 possuem indicação de posição do contato (CPI) no frontal. É muito fácil identificar se o minidisjuntor está na posição ON ou OFF para uma manutenção rápida e segura.

Certificações e marcações

Os minidisjuntores S200 estão em conformidade com a IEC 60947-2 e todos os padrões internacionais relevantes para cada mercado e segmento para os quais eles são destinados. Possuem também a marcação de conformidade com a norma UL 1077.

Terminal duplo

O exclusivo terminal duplo permite a conexão simultânea e segura de cabos e barramentos.

Impressão a laser

Todas as impressões dos minidisjuntores S200 como as certificações na parte superior e lateral e a identificação do produto são gravadas a laser. A impressão a laser garante resistência à fricção, arranhões e solventes. Facilita e assegura a identificação dos produtos em caso de manutenção ou substituições.

Materiais do invólucro

Fabricados com termoplásticos de última geração é possível reciclar os minidisjuntores após seu uso. Especialmente o material do invólucro termoplástico pode ser reutilizado. Os minidisjuntores S200 são 100% livres de halogêneos e não poluem o meio ambiente.
